

Cornerstone Non-Hazardous Medical Waste Recycle Program

About the Program:

The Eco-Friendly solution to dispose of your **"Single Patient Use"** Non-Hazardous Medical Products. We divert this waste away from the landfill, while also diverting to a recycle process. Using the **Waste to Energy (WTE)** system, we process the waste through incineration (emissions scrubbed), recycle the remaining elements, and generate renewable energy in the process. A Circular economy responsibility for a **"Waste Better"** environment.

Waste to Energy: Why it Matters

- Carbon-negative renewable energy
- Reduced methane & landfill volume
- Recovers metals for recycling
- Advanced emission controls for heavy metals and CO₂
- Safe, clean, and eco-conscious

Simple 6-Step Process

1. Request a Quote
2. Place your Order
3. Receive 5 Flat-packed Boxes.
4. Fill each Box - Up to 50 scopes
5. Arrange Pick up of Filled Box - FedEx
6. Obtain REC destruction certificate

What Can Be Recycled and How

"Single Patient Use" Products included in our program. Endoscopes, Laryngeal Airways & VL Blades...
3 Box sizes are available:

- Large Container Box - Broncho/Gastro Scopes.
- Medium Container Box - ENT/Urology Scopes
- Medium/Small Container Box - LMA's and VL Blades

Box size limited to its product category except LMA and VL blades can be Mix Use in Scope Boxes.
